SCREENPRINTING MACHINES LEADING THE WAY

YO - YO

*sliding flash cure system
consisting of a motor-operated base and sliding radiator.*

technical data:
power supply: 380/400V+N+PE
energy consumption: 6,1 kW
Radiator stroke: 1.000 mm
Radiator width: 700 mm

Advantages:
low energy-consumption, the power-level can be adjusted
the start- and finish point can be adjusted
the print remains free so that the actual drying process can be checked easily
The powerful air-circulation will be shorten the drying process
